2. Read the passage carefully and answer the question given below : [5]

Smoking is the major cause of mortality with bronchogenic carcinoma of the lung and is one of the factors causing death due to malignancies of Larynx. Some experts say that smoking is linked to memory

problems because it contributes to narrowed arteries that restrict blood-flow to the brain. One of the causes of memory decline in relation to the brain function could be the nerve cell death. It is also found that people who smoke more cigarettes a day have poor memories in middle age than non-smokers. Abstinence from smoking is essential, not only to avoid this systematic effect but also to reduce the ill-effects on environment.
